**Card Sort Groups (Participant 2):**

General Info:

[About Artist (bio)]
[Contact Info Page]
[Resume Page]
[Introduction of Artist Video]

General Art Stuff:
[General Artist Work Flow]
[3D Model View Page]

Tutorials/Videos:
[Link Pages to download possibly needed software]- I think it would be best to simply have the links to download different software's in the same area of where they will begin learning how to draw so they don't have to keep jumping around the site.
[3D Art Tutorials]
[2D Art Tutorials]
[Video Library of speed artwork] – While not tutorials I feel people will still use these as sample tutorials so should be placed in this sections

Downloadable Items:
[3D Models Download Page]
[3D Model View Page]

Blogs:
[Blog page for work currently in Progress]
[Comment section for visitors to communicate with each other]
[Art Work of the Week either from Artist for visitors of website]

?:
[Social Media links] – I really feel like these does is not really needed as a link as when it comes to contacting you via social media a small icon on your contacts page would be enough. Also when it comes to blogs or YouTube other areas of your site would make already provide links to these locations.

[Log in Scene?]- what do you mean by scene or do you mean log in screen? Also this seems like it would only be needed for the blog section of your page not the overall webpage.
